Brand: Genexa
Active Ingredients: Acetaminophen
Specific Uses For: Cold, Fever
Product:
Item Form: Liquid
Age Range (Description): Kid

About this item

- Temporarily reduces fever and provides temporary relief from a range of cold and flu symptoms, including minor aches and pains, headache and sore throat. For children ages 2-11 years old.
- Made with organic blueberry flavor.
- Each 5mL dose of this oral suspension medicine contains 160 milligrams of Acetaminophen to provide effective pain and fever symptom relief.
- No artificial sweeteners or preservatives, no artificial dyes, no parabens, and no common allergens. Certified gluten-free, vegan, and non-GMO.
- Free of alcohol and gentle on little tummies.
- Pediatricians prefer Genexa Children's Acetaminophen Oral Suspension over Children's Tylenol Pain + Fever liquid products for their own children based upon a comparison of their ingredients.

Genexa, Inc.

National Advertising Division, NAD Case #7108, October 2022

National Advertising Review Board, NARB #307, January 2023

- Johnson & Johnson Consumer, Inc. McNeil Healthcare Division (JJCI) challenged express and implied claims made by Genexa Inc. for its over-the-counter children's pain and fever medicine. Specifically, JJCI challenged several express and implied pediatrician preference claims about the inactive ingredients in traditional OTC children's pain and fever medicine. NAD found that one reasonable message conveyed by the challenged advertising is that pediatricians surveyed prefer Genexa's product to JJCI's products, although the surveyed pediatricians expressed a preference solely based upon the ingredients contained in the products. NAD recommended that the pediatrician preferred claims be discontinued.
- JJCI also argued that the Genexa advertising made false and disparaging claims about traditional children's pain and fever medicine, including claims such as "PARABENS is stuff you'll find in ALL PURPOSE CLEANER. And, for some reason, in kids' fever medicine." NAD concluded that the challenged claims conveyed the message that other products are unsafe or pose potential risks or dangers, a message that was not supported, and recommended that the claims be discontinued. Genexa appealed NAD's decision.
- An NARB panel found that Genexa had no support for the challenged claims and recommended that the claims be discontinued or modified to make clear that the pediatrician's preference was limited to the ingredients. The panel also affirmed NAD's finding related to the challenged ingredient claims that the advertising conveyed a message that the inactive ingredients in other products are generally unsafe, harmful, or dangerous, and that such a message was unsupported. The NARB panel recommended that

such claims be discontinued or modified to avoid conveying the message that competing products with other inactive ingredients are harmful.
